JVD CORDLESS KETTLES & TRAYS

JVD has a complete line of quality cordless kettles to meet the needs of the hoteliers. The kettles are fabricated of the highest quality materials and components. They are carefully designed for ease of cleaning and maximum heat transfer for fast boil. The internal stainless steel plate is designed with optimum diameter for a given capacity to provide the greatest surface area for faster cooking or cooling.

By using concealed heating technology, it eliminates scale collection and extending the life and efficiency of the kettle. Water viewing windows, a convenient 360 degrees rotational base and hinged locking lids for safety are just some of the additional benefits you would derive from JVD kettles.

For the ultimate in style and convenience, JVD has a series of amenity trays that will complement the kettles. Made of special melamine material, the trays provide excellent resistance against heat and scratches. JVD amenity trays are certain to delight your staying guests.

Beyond Comfort

JVD Silent Minibars use 100% silent heat absorption cooling technology. There are no compressor and no moving parts and is thus completely silent during operation. This means your guests even the "lightest sleepers" enjoy maximum comfort.

Beyond Hardware

JVD Silent Minibars are engineered and built to last and to meet the requirements of the demanding hospitality environment.

Our ability to meet your needs go beyond just recommending hardware. Purchasing a JVD silent minibar is a long-term investment in quality. Everyone is built to withstand rugged, day to-day use and to last the life of the installation.

Beyond Satisfaction

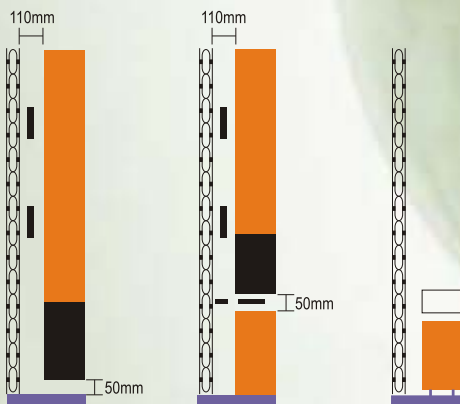

JVD has provided innovative hospitality solutions for more than three decades. You'll find JVD installations throughout the world; added-value products that work harder, smarter and better than any alternative.

JVD support goes far beyond the right products. Our extensive organization enables you to feel secure in the knowledge that every system can be installed and maintained by dynamic professionals committed to unparallel customer service.

Ventilation Requirement

When integrating the minibar into your hotel room cabinet, it is important to note that the cooling unit requires fresh air. Below chart shows you the necessary channel for air circulation. The surrounding area of the minibar must have unhindered airflow.
