

**In-room security is serious business.....
You need a Serious Partner**

Today, more than ever, your business guests would expect the best combination of both security and convenience. JVD digital in-room safes exceed expectations. JVD safes are powered by the most advanced processors; engineered and built to provide maximum security for hotel guests. They are built to withstand rugged day-to-day use and to last the life of the installation. They are user-friendly and yet offer one of the most secured systems in today's room safe security. It is a long-term investment in quality.

No other system offers the extra measures of quality and convenience. Only JVD does

Every hotel's needs and circumstances are uniquely its own. With more than 30 years of experience in providing solutions to the hospitality industry, JVD knows and understands these differences and has taken them fully into

consideration in our designs. But the ability to meet your needs go beyond recommending hardware. JVD safes bring you a number of impressive benefits, offers a better way to further extend your services to your valued guests.

JVD hospitality difference

JVD builds its future by safeguarding Quality, Competitiveness and the French know-how. Our focus on serving the hospitality institutions throughout our 30 years of proven leadership has seen JVD products installed throughout the world; added value products that work harder, smarter and better than any alternative.

JVD global support

JVD support goes far beyond the right products. Headquartered in France, JVD's manufacturing concerns, subsidiaries and distribution network is globally extensive. You will feel secure with the knowledge that the finest equipment is supported by a professional network of subsidiaries and trained Distributors.

JVD offers premium quality ironing products. No other ironing centre offers a permanent solution to all your ironing needs.

IRON CONNECTION - specially designed to protect your property. Iron burns on carpets, bedspreads and even furniture are an expensive problem for nearly every hotel. The Iron Connection provides the solution by combining the iron, board and holder, making it necessary to use the board every time the iron is needed.

IRON ORGANIZER - consisting of the purpose-built iron holder and board holder, the Iron Organizer is specially designed with all the same quality and safety consideration. The iron holder is mounted exactly where you need it to be, then you simply place and custom fit your iron with the adjustable "wings" on the sides. The iron will not fall out, preventing serious injury. The cord neatly wraps at the end. The smart looking ironing board holder completes the space-saving task.

IRONING BOARDS - from the economy to the very best, the ironing boards are designed to meet heavy-duty usage. The models have secure-grip end caps that won't fall off, stain and scorch resistant cover and padding, smooth and adjustable height mechanism, strong steel mesh top and with multi-weld T-leg construction for added strength and durability.

IRONS - ViVo iron is specially designed for the hotel usage. Light and powerful, it boasts of all the essentially functions that make dry or steam ironing a breeze. It is simple to use with fabric guide selector, anti-calc, a drip stop system and a non-stick soleplate. Most importantly, the Vivo has an automatic motion safety system.

The JVD Ironing Centre is a long-term investment in quality and safety. They are designed to withstand rugged, day-to-day use and to last the life of the installation. They are practical, highly efficient and especially designed for user-friendliness, safety and maximum reliability.

Used today in over 700,000 hotel rooms worldwide; invented specifically for hotel use.
